## Why fork and exec?

fork is very useful when the child...

- is cooperating with the parent
- · relies upon the parent's data to accomplish its task
- → Simple interface

## Example: a web server

```
while (1) {
  int sock = accept();
  if ((child_pid = fork()) == 0) {
    // Handle client request
  } else {
    // Close socket
  }
}
```
